

# Top 0.1% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Top 1.0% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Top 2.5% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Top 5.0% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Top 10.0% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Top 15.0% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Top 20.0% expressed genes from GTEx heart and kidney data were used to filter variants from the CHD cohort

# Summary of CHD analysis using GTEx tissue datasets
